# DRG Diagnostics

DRG Instruments GmbH, founded in 1973 as a subsidiary of DRG Intl. Inc., USA, is a diagnostics manufacturer and distributor with successful operations in over 110 countries. The DRG Group focuses on high technology medical diagnostic areas such as Diabetes Diagnosis, Gynecology, Oncology, Immunology, Infectious Diseases and Toxicology. The highly skilled DRG Staff of medical, clinical, marketing and service specialists are experts at taking innovative technology to market through local territory knowledge and contacts, end-user training, education and cost effective financial and logistical support.

The DRG-Development and Immunoassay production facilities are located in Marburg, Germany, in addition to OEM manufacturing in the USA.

A wide range of new, occasionally unique, ELISA kits have been developed. The DRG ELISA kits compete effectively in both price and performance in all major world diagnostics markets.

To complete the diagnostic reagent line, DRG supplies the clinical laboratory with all necessary equipment, including a semi-automated microtiterplate processor, the DRG E-LizaMat 3000, and fully automated Open Systems for 2, 4 or 6 microtiterplates, which are fully compatible with all Elis. DRG offers the FIRST fully automated Analyzer for Immunoassays, Clinical Chemistry and Immunoturbidimetry.

## DRG:HYBRID XL®

The DRG Group operates through a network of DRG Subsidiary Companies in Germany, Poland, Russia, China and the Czech Republic, and through Distributors in Europe, the Middle East, Asia, Africa and the Pacific Region. This infrastructure offers access to specialized medical markets in most major countries around the world.

DRG Instruments GmbH, mit Sitz in Marburg, wurde im Jahre 1973 als Niederlassung von DRG International, Inc. USA gegründet. Heute widmet sich die Firma hauptsächlich der Entwicklung, Produktion und dem weltweiten Vertrieb von neuen und innovativen ELISA Testsystemen.

### Technologie

DRG arbeitet ständig daran die neuesten wissenschaftlichen und klinischen Erkenntnisse in Bereichen wie Diabetes, Gynäkologie, Onkologie und Virologie und ihrer Diagnostik in die Neu- und Weiterentwicklung von Immunoassays mit einzubeziehen.

Die enge Kooperation mit unseren Kunden hat es uns in der Vergangenheit immer ermöglicht auf die Anfrage und Wünsche des Diagnostika-Marktes schnell und effizient zu reagieren. Diese enge Form der Zusammenarbeit stellt einen zentralen Punkt unserer Entwicklungen dar, um die bekannt gute Qualität unserer Produkte und unseres Kundenservices weiter zu verbessern.

Unsere Forschungs- und Entwicklungsabteilung arbeitet sehr erfolgreich und effektiv bei der Entwicklung neuer, innovativer ELISAs und Chemilumineszenz Immunoassays. Insbesondere der enge Kontakt zu universitären Einrichtungen ermöglicht uns die rasche Umsetzung neuer Ideen und Erfindungen.

### Vertrieb Weltweit

Die DRG Group operiert durch ein Netzwerk an Niederlassungen in Deutschland, USA, Polen, Russland, China und der Czechischen Republik und über Händler in Europa, Mittlerer Osten, Asien, Afrika und Pazifik.

Diese Infrastruktur ermöglicht den Zugriff auf spezialisierte medizinische Märkte in den wichtigen Ländern dieser Welt.

Zur vollautomatischen simultanen Abarbeitung von Immunoassays und klinisch chemischen Parametern bieten wir den neu entwickelten Laboranalyzer DRG:HYBRID XL® an.

Production Facility, Produktionsstätte, Marburg

# DRG ELISAS / EN ISO 9001 / I 3485

## Quality

DRG Instruments GmbH has established and applies a quality management system for the following scope:

**Design and Development, Manufacture and Distribution of in vitro Diagnostics by Enzymeimmunoassays (ELISAS) and Radioimmunoassays (RIAS) Technology.**

Proof has been furnished that the requirements specified in

**EN ISO 13485:2012/AC:2012**

**EN ISO 9001:2008**

**ISO 13485:2003 CMDCAS are fulfilled**

We participate in a number of quality assessment schemes, which include Instand (Germany) and RfB, Referenzinstitut für Bioanalytik, Bonn.

DRG products meet the essential requirements of the directive 98/79/EC of 27. October 1998 on in-vitro diagnostic medical devices.

## Benefits

Simple protocols and room temperature incubations reduce errors and technician time.

Automatable.

Versatile. Compatible with most available equipment.

Added confidence in results.

Assured continuity of supply.

Control of production methods results in economic prices.

- Microtiter Wells - Breakable
- Long shelf life
- Good correlation to RIA'S
- Direct determination
- Specific
- Convenient and economical
- Easy to use
- Fast
- Sensitive

## DRG-ELISAS

Einfache Testabläufe bei Raumtemperatur reduzieren Fehler bei der Abarbeitung.

DRG ELISAS sind kompatibel zu sämtlichen marktgängigen MTPL-Photometern und MTPL-Vollautomaten.

Gleichbleibende, kontrollierte Qualität gewährleistet zuverlässige Ergebnisse.

Verbraucherfreundliche Preise bei schneller Lieferung gewährleisten eine ökonomische Durchführung.

- Mikrotiterstrips einzeln brechbar
- Lange Haltbarkeit (mind. 12 Monate bei 2-8°C)
- Direkte Bestimmung
- Hohe Spezifität und Sensitivität
- Zuverlässige Ergebnisse
- Gute Korrelationen mit etablierten RIAS
- Anwenderfreundlich und ökonomisch
- Schnell

## Qualität

Das DRG Qualitätsmanagement-System nach EN ISO 9001:2008, EN ISO 13485:2012 AC:2012 und ISO 13485:2003 CMDCAS zertifiziert vom TÜV Rheinland, garantiert eine gleichbleibende, ständig kontrollierte Produktqualität.

Zur Überprüfung und Sicherstellung der Produktqualität nehmen wir regelmäßig an externen Qualitätskontrollen wie z.B. den Ringversuchen der RfB, Referenzinstitut für Bioanalytik in Bonn sowie INSTAND in Düsseldorf teil. Viele DRG Produkte erfüllen die Anforderungen der EU-Richtlinien 98/79/EC vom 27.10.1998 für In-Vitro-Diagnostika (IVD's) und sind mit dem CE Zeichen gekennzeichnet.

# DRG:HYBRiD•XL®

## Fully automated Continuous Access Analyzer for Immunoassays and Clinical Chemistry

### Innovation

DRG introduces the totally newly designed DRG:HYBRiD-XL® Analyzer. This innovative and unique technology allows, for the first time, the simultaneous measurement of immunoassays and clinical chemistry parameters including turbidimetric tests in one sample.

The comprehensive assay menu includes routine and niche parameters.

### Specifications

#### Test Principle

- Enzym Immunoassays
- Clinical Chemistry
- Immunturbidimetrie

#### Samples/Cartridges

- Up to 40 samples / run
- (36 primary tubes or 40 secondary tubes)
- Random access possible
- STAT possible
- Reagents on board (cartridge); (ready to use)
- Barcoded reading of samples and reagents
- Serum, plasma, stool, urine or saliva samples
- Sample dilution up to 1:1000

#### Calibration

- Barcoded master curve
- 2 point recalibration
- Long stability

#### Efficiency

- First results after 10 minutes
- Long walk away times
- Short hands-on times
- Benchtop analyzer (60,8 x 63,5 x 58,6 cm high)
- Only 3 system-reagents (Wash/Needle cleaning and system solution)
- Clot detection
- Liquid level detection
- Variable assay-sizes (40, 80 tests)

#### Handling/Interface

- Color monitor, touchscreen (8,5 inch.)
- Smart user guidance
- Bi-directional interface

## Vollautomatischer Continuous Access Analyzer für Immunoassays und Klinische Chemie

### Innovation

Der vollkommen neu entwickelte DRG:HYBRiD-XL® Analyzer bietet Ihnen mit seiner innovativen Technologie erstmalig die Möglichkeit, von einer Patientenprobe simultan Immunoassays und Klinisch Chemische Parameter inklusive Turbidimetrische Tests zu prozessieren.

Das umfangreiche Assay Menü umfasst sowohl Parameter für die Routinediagnostik als auch Spezialtests.

### Technische Daten

#### Testprinzip

- Enzymimmunoassays
- Klinische Chemie
- Immunturbidimetrie

#### Proben/Reagenzienintegrale

- max. 40 Proben / Run
- (36 Primärröhrchen oder 40 Microtubes)
- Random Access möglich
- STAT möglich
- Alle Assaykomponenten in einer Kartusche, gebrauchsfertig
- Barcode Identifizierung der Proben und Reagenzien
- Serum, Plasma, Stool, Urin oder Speichel Proben
- Probenverdünnung im Gerät (max. 1:1000)

#### Kalibration

- Masterkurve per Barcodes
- 2-Punkt Rekalibrierung
- Lange Stabilität

#### Effizienz

- Erste Ergebnisse nach 10 Minuten
- Lange „Walk Away“ Zeiten
- Kurze „Hands on“ Zeit
- Tischgerät (60,8 x 63,5 x 58,6 cm Höhe)
- Nur 3 System- Reagenzien (Wasch-/Spüllösung, Nadelreinigung)
- Gerinselerkennung
- Liquid level detection
- Variable Packungsgrößen (40, 80 Tests)

#### Bedienung/EDV-Anbindung

Farbmonitor/Touchscreen Bedienung (8,5 Zoll)  
Einfache Benutzerführung  
Bidirektionaler Anschluss zum HOST-Rechner.

# Abbreviations Abkürzungen

## I. Assay Type

### **ELISA (Enzyme Linked Immuno Sorbent Assay)**

The ELISA (Enzyme Immuno Assay) is heterogeneous, immunological determination of substances in body liquids. The reaction between antigen and specific antibody is assayed by determination of an enzyme which is conjugated to the antigen or antibody. ELISAS may be designed as competitive or sandwich assays. ELISAS are used for the determination of drugs, hormones and proteins and avoid handling of radioactive substances at a similar sensitivity as a RIA.

### **RIA (RadioImmunoAssay)**

This competitive immunoassay is an established method for the determination of very low concentrations of proteins and other substances. The analyte molecules and a constant amount of tracer compete against a specific antibody. Excessive tracer is removed by washing. Comparison of the measured radioactivity with a standard curve allows the determination of the analyte concentration.

### **IRMA (ImmunoRadioMetricAssay)**

Double sided immunoradiometric assay with two antibodies (one in solution the other bound to a solid phase) against different epitopes of the analyte.

## 2. Method

BIO: Microbiological MTPL Assay  
CB: Coated Beads  
CCH: Clinical Chemistry (DRG:HYBRID-XL)  
CLA: Chemiluminescence Immunoassays  
DOT: Dot Blot  
EIA: Enzymimmunoassay  
ENZ: Colorimetric MTPL Assay  
MTPL: MicrotiterPlate  
RAP: Rapid Screen Test  
SLV: Saliva ELISA

## I. Assaytype

### **ELISA (Enzyme Linked Immuno Sorbent Assay)**

Der ELISA ist eine heterogene, immunologische Bestimmung biologisch aktiver Substanzen in Körperflüssigkeiten. Dabei wird die Reaktion zwischen Antigen und spezifischem Antikörper durch die nachfolgende Bestimmung eines an das Antigen oder den Antikörper gebundenen Enzyms nachgewiesen. Man unterscheidet zwischen kompetitiven und Sandwich Assay. Der Test eignet sich vor allem für Medikamente, Hormone und Proteine und umgeht bei ähnlicher Empfindlichkeit wie ein RIA den Umgang mit radioaktiven Stoffen.

### **RIA (RadioImmunoAssay)**

Dieser kompetitive Immunoassay ist eine etablierte Methode zur Bestimmung niedriger Konzentrationen von Proteinen und niedermolekularen Substanzen. Die Antigenmoleküle und eine konstante Menge Tracer konkurrieren um Bindung an eine vorliegende Menge des spezifischen Antikörpers. Die nicht gebundenen Teile werden durch Waschen entfernt. Durch Vergleich der gemessenen Radioaktivität mit einer Standardkurve erhält man die Konzentration des gesuchten Analyten.

### **IRMA (ImmunoRadioMetricAssay)**

Zweiseitiger immunoradiometrischer Assay mit zwei Antikörpern (einer in Lösung, der andere an einer festen Phase gebunden) gegen verschiedene Epitope des Analyten.

## 2. Methode

BIO: Mikrobiologischer MTPL Assay  
CLA: Chemilumineszenz-Immunoassay
